

MAURICIO CHIRINO

[Mail](#) | [Blog](#) | [LinkedIn](#) | [GitHub](#) | [Medium](#)

SUMMARY

Sr. mobile engineer with 13+ years specializing in legacy modernization and team growth, leading initiatives that cut release overhead and build times while mentoring engineers on testing practices. Now pursuing a **Master's in Artificial Intelligence (ORT University)**, bringing hands-on **AI fluency** and **fullstack mobile development** into how I design, prototype and ship. Combines deep technical expertise (Swift/iOS, TDD, CI/CD) with architectural decisions to elevate engineering standards and build resilient, scalable mobile products.

SKILLS

- **Programming Main Language:** Swift / ObjC
- Full testing pyramid: unit tests to E2E via [Maestro](#)
- Design patterns, SOLID and Clean principles
- REST API design and Serverless deployments
- Entire app lifecycle domain (code -> ship -> CI/CD)
- Dependency managers: [SPM](#), Pods and Carthage
- CI/CD via GH Actions / Bitrise
- Version control: Git
- **AI-driven development:** Cursor & Claude Code; applied AI/ML (Master's coursework)

EXPERIENCE

Sr. iOS Engineer – [Bitso](#) – México (remote)

June 2021 – Present

- **163% test coverage increase** (19%→50%) in one year for legacy codebase
- Drove **Maestro** automated adoption for E2E coverage of critical flows
- Guided cross-team initiatives to reduce overhead in the app's release process
- Drove modularization: from monolith to multiple in-repo packages for the entire guild process, **cutting local build times per feature from minutes to seconds**
- Mentorship on testing and coding best practices through documentation (via [company's blog](#), internal docs and 1:1 tutoring)
- Integrated **AI-assisted workflows (Cursor, Claude Code)** into day-to-day development to speed up refactoring and review

iOS SSR+ Engineer – [PedidosYa](#) – Montevideo

Aug 2019 – May 2021

- Refactored and rewrote large chunks of legacy code, leaving unit tests behind every modification
- Mentored peers on testing and coding [best practices](#) through 1:1 workshop training
- Conducted interview process for potential new candidates

iOS engineer - *Intive* - Buenos Aires

July 2018 - July 2019

- Part of a multidisciplinary team in a software agency
- Scrum best practices project discipline
- Shared knowledge in iOS specific platform inside the company's guild

Mobile developer - [Upwork freelance](#) - Remote

May 2013 - October 2017

- Worked with +30 clients, gathering requirements and turning them into proper products for years
- Self time management to meet hard deadlines
- Worked seamlessly throughout different timezones for clients in the Americas, Europe and Asia

PROJECTS

Breath

- Developed a freemium one-minute breathing app: StoreKit/RevenueCat subscriptions + AdMob on the free tier
- Shipped a referral growth loop end to end using serverless Firebase Cloud Functions
- Full accessibility compliance since day 1

MatchWords

- Developed in-house algorithm to assess word recognition across multiple languages
- Blended UIKit and SwiftUI features seamlessly
- Test coverage to iterate quickly without regressions
- Dark mode and localization support (English and Spanish stores)

Open-source libraries — dependency-free building blocks for production codebases: [MauriNet](#), [MauriUtils](#), [MauriKit](#), [NotificationsEngine](#), [TrackingEngine](#),

EDUCATION

Master's in Artificial Intelligence at [ORT University](#),
Montevideo

In progress

iOS Developer Nanodegree at [Udacity](#)

September 2017

[iOS App Development with Swift](#) at [Coursera.org](#)

May 2016

Bachelor's in Software Engineering at [UNET](#)

November 2014

INTERESTS

Avid cyclist; lifelong reader of science fiction and comics; enthusiastic home-cooking experimenter.
