

MAURICIO CHIRINO

[Mail](#) | [Blog](#) | [LinkedIn](#) | [GitHub](#) | [Medium](#)

SUMMARY

Sr. mobile engineer with 13+ years specializing in legacy modernization and team growth, leading initiatives that cut release overhead and build times while mentoring engineers on testing practices. Now pursuing a **Master's in Artificial Intelligence (ORT University)**, bringing hands-on **AI fluency** and **fullstack mobile development** into how I design, prototype and ship. Combines deep technical expertise (Swift/iOS, TDD, CI/CD) with architectural decisions to build resilient, scalable mobile products.

EXPERIENCE

Sr. iOS Engineer – [Bitso](#) – México (remote) June 2021 – Present

- **163% test coverage increase** (19%→50%) in one year on a legacy codebase; championed [Maestro](#) adoption for E2E coverage of critical flows
- **Led modularization (12× faster builds)**: transformed a monolith into multiple in-repo packages, cutting build times from minutes to seconds
- **Integrated AI-assisted workflows** (Cursor, Claude Code) into daily development to speed up refactoring and review
- Conducted technical & behavioral interviews for Sr. and Staff engineering candidates
- Mentored engineers on testing & coding best practices via [company blog](#), internal docs, and 1:1 tutoring

iOS SSR+ Engineer – [PedidosYa](#) – Montevideo Aug 2019 – May 2021

- Refactored legacy codebase: rewrote critical components with comprehensive unit-test coverage
- Led 1:1 workshop training on testing and coding [best practices](#)
- Conducted technical interviews for iOS engineering candidates

PROJECTS

[MyStickers](#)

- App to track and share sticker collections with QR-code sharing
- Snapshot testing for rapid dark-mode adoption
- Core Data persistence

[MatchWords](#)

- In-house algorithm for multi-language word recognition
- Seamlessly blended UIKit with SwiftUI features
- Test coverage with dark mode & EN/ES localization

Open source — dependency-free building blocks: [MauriNet](#), MauriUtils, MauriKit, NotificationsEngine, TrackingEngine

SKILLS

Languages & Frameworks: Swift, Objective-C, SwiftUI, UIKit

Testing & Automation: Entire testing pyramid (unit → E2E via Maestro), CI/CD via GitHub Actions

Architecture: Design patterns, SOLID, Clean Architecture, REST API design

Tooling: SPM, CocoaPods, Carthage, Git, concurrency management

AI: Cursor, Claude Code, applied AI/ML (Master's coursework)

EDUCATION

Master's in Artificial Intelligence – [ORT University](#), Montevideo | In progress

iOS Developer Nanodegree – [Udacity](#) | September 2017

[iOS App Development with Swift](#) – Coursera | May 2016

Bachelor's in Software Engineering – [UNET](#) | November 2014
